ADM-6.2

OEL 4/11/64

24 APR 1964

MEMORANDUM FOR: Director of Logistics

25X1A5a1

SUBJECT : Request for Task Order with [REDACTED]

25X1A5a1

25X1C1a1

1. The Office of ELINT presently has under development an aperiodic receiving system to operate in the high frequency spectrum to detect [REDACTED] transmissions. The prototype model of the system is being developed by [REDACTED] and will incorporate a [REDACTED]

25X1A5a1

[REDACTED] recorder. The [REDACTED] recorder was developed under a Department of the Navy contract and was intended to be a throw-away unit usable for a twelve hour period. This recorder is being used in the prototype system as a matter of expediency and economy. With future models of the aperiodic system a new instant start recorder, configured to fit the system, is required.

25X1A5a1

25X1A5a1

2. [REDACTED] was requested to submit a proposal based on Specification No. RD-64-128, for a new instant start recorder incorporating the proprietary design used in the original unit. [REDACTED] has been received and reviewed by this Office. The proposal is acceptable provided the prototype unit meets the start time and other specifications outlined in RD-64-128. The problem areas mentioned in the proposal have been duly noted.
